MOHINKHAN MALEK

Full Stack Developer – python

Profile

Aspiring Full Stack Developer with hands-on experience in building responsive and scalable web applications using Python, Django, JavaScript, and HTML&CSS. Currently pursuing a Bachelor of Commerce and a Full Stack Developer certification. Skilled in developing eCommerce platforms, quiz systems, and trust management websites, I am passionate about coding and problem-solving. Fluent in multiple languages and seeking opportunities to apply my knowledge in a dynamic and challenging environment.

My Project

Full-Fledged eCommerce Website

Developed an eCommerce platform using Django, incorporating features such as an authentication system, shopping cart, wishlist, and Stripe payment integration for seamless online transactions.

Quiz Platform

Created a dynamic quiz platform where users can create exams, join tournaments, and access a comprehensive authentication system for secure participation.

Trust Management System

Designed and developed a system for trust management, allowing members to add, update, or delete records, track payments, mark deceased members, and automatically collect contributions. Includes full payment reports and export functionality for seamless data handling.
